## 2011 Scientific Assembly:

# “The Developing Science of Violence and Abuse: Toward a New Understanding”

Crowne Plaza Hotel | April 15–16, 2011 | Bloomington, MN  
Half Day Pre-Conference April 14th

**A** growing body of research is beginning to yield important new insights into the physiological mechanisms that connect exposure to abuse and adverse health consequences. This research, and its implications for considering abuse as an important health issue, have yet to be incorporated into the core health care education curricula. In part, this conference is designed to accelerate the adoption of teaching about violence and abuse by highlighting new research and its implications.

The conference audience will be multi-disciplinary and include physicians, nurses, dentists, social workers, psychologists, physical therapists, public health, academic faculty and advocates who work in health care settings. AVA seeks to attract scientific researchers in this growing field and to engage them in discussion with their peers.

### ABOUT AVA

---

The Academy on Violence and Abuse (AVA) exists to advance health education and research on the prevention, recognition, treatment and health effects of violence and abuse.

By expanding health education and research, the AVA will integrate knowledge about violence and abuse into the training of all health professionals, promote the health of all people, protect the most vulnerable, and advance health care policies that promote safe families, workplaces and communities. The AVA will be an academic leader addressing health education and research issues related to violence and abuse, focusing on an end goal to ultimately minimize the health effects of violence and abuse.

### PRECONFERENCE

#### *Developing Research on Violence: Faculty Development Course*

**1:00–5:00 PM**

AVA is interested in helping to promote the careers of promising new champions of this work. This workshop is designed to develop a scholarly focus around violence and abuse by providing information to faculty new to this area of science. The pre-conference will address issues specific to abuse research including: types of scholarly research, levels of evidence, navigating the IRB process, funding and academic productivity. The workshop will serve as the beginning of a mentoring relationship with AVA's national experts in the field of violence and abuse research.

#### **Faculty:**

Candace Burton, RN, PhD  
F. David Schneider, MD  
Aggi Tiwari, RN, PhD, FAAN  
Bea Yorker, JD, PhD, FAAN
